Report of Independent Certified Public Accountants

Management
Tesla Motors, Inc.

We have performed the procedures listed below, which were agreed to by management of Tesla Motors, Inc. (the “Company” or “Lead Participant”) and the State of Nevada (the “Regulator”) (collectively, the “Specified Parties”), solely to assist you in determining compliance with the State of Nevada SB1 Incentive Compliance agreement for the period of October 17, 2014 through June 30, 2015. Tesla Motors, Inc.’s management is responsible for the schedules of qualified employees and construction employees and the listing of all capital investments made by each Participant (as defined in the SBI Incentive Compliance Agreement) in the State of Nevada. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the Company and the State of Nevada. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

The procedures we performed and our findings are as follows.

Required Qualified Employee Audit Data

- We obtained a schedule from each Participant listing all qualified employees of the Project Site for the period of October 17, 2014 through June 30, 2015.
- We selected a sample of 25% of the qualified employees per the summary sheet. For each selected qualified employee, we agreed wages paid, hours worked and employment term to paystubs or system-generated payroll reports. For each selected qualified employee, we agreed residency status to a current (during the period under review) and valid Nevada driver’s license and motor vehicle registration (if applicable). We also obtained proof that each qualified employee was offered coverage under a plan of health insurance provided by the Participant. We noted one exception as to residency status, and therefore, expanded our sample, with no further exceptions noted. Our expanded sample selected resulted in the 90% accuracy threshold being met.
- We recalculated the average wage of qualified employees to verify that the minimum average wage of \$22.00 was met without exception.
- We recalculated the residency as a percentage of qualified employees to verify the percentage reported and that at least 50% of qualified employees are Nevada residents, as required, was met without exception.
- We agreed the schedule of qualified employees obtained from each participant to the Required Qualified Employee Audit Data form without exception.
- We recalculated the transferable tax credit determined by the Company based on the number of qualified employees as noted above and traced to the combined summary and transferable tax credit form, without exception.

Required Construction Employee Audit Data

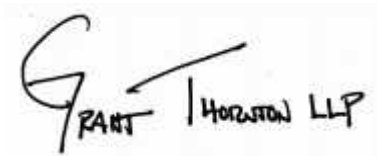

- We obtained a schedule from each Participant listing all construction employees of the Project Site for the period of October 17, 2014 through June 30, 2015.
- We selected a sample of 25% of the construction employees listed as Nevada residents per the summary sheet. For each selected construction employee, we agreed residency status to a current (during the period under review) and valid Nevada driver's license. Our sample selected resulted in the 90% accuracy threshold being met.
- We recalculated the residency as a percentage of construction employees to verify the percentage reported and that at least 50% of construction employees are Nevada residents, as required, was met without exception.
- We agreed the schedule of construction employees obtained from each participant to the Required Construction Employee Audit Data form without exception.

Required Property Audit Data

- We obtained the real and personal property listings from each Participant listing all capital investments made by each Participant in the state of Nevada for the period of October 17, 2014 through June 30, 2015.
- We selected a sample of property additions during the period of 25% of the total book value of property additions during the period.
- We reviewed the supporting documentation obtained for the sampled property additions to determine that the addition meets the definition of capital investments per the Incentive Agreement, and verified determination of depreciable life, without exception. Our sample selected resulted in the 90% threshold being met.
- We footed the listings by asset class/depreciable life without exception.
- We agreed the listings obtained from each participant to the Required Property Audit Data form, by asset class/depreciable life grouping and in total without exception.
- We recalculated the transferable tax credit determined by the Company based on the total Capital Investment for the period as noted above and traced to the Combined Summary and Transferable Tax Credit form without exception.

We were not engaged to and did not conduct an examination or a review, the objective of which is the expression of opinion or limited assurance in determining the compliance with the State of Nevada SB1 Incentive Compliance agreement. Accordingly, we do not express such an opinion or limited assurance. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of Tesla Motors, Inc. and the State of Nevada and is not intended to be and should not be used by anyone other than these specified parties.
