We request that Ryze Renewables be placed on the agenda for the May GOED Board meeting.

Dear Commission Members:

Ryze Renewables Las Vegas is a maker of 100% drop in renewable diesel. The plan is to purchase and repurpose a mothballed biodiesel facility in Las Vegas, Nevada. We plan to hire and train employees from the local Las Vegas area, and begin processing at the Las Vegas facility. The target date for the physical move is Quarter 3, 2017 with commercial production and operations to commence Quarter 3, 2018.

The decision to purchase another operation in Las Vegas was due to several factors, including the business tax structure, cost of living, and logistic advantages offered by the region. In addition, Ryze Renewables Las Vegas is aware of the benefits of the State Incentive Program, and this was also a critical factor in deciding to locate the production operation to Las Vegas.

The plan to locate in Las Vegas involves internal expansion of the existing facility and investments in additional equipment. In order to staff and operate our operations, the plan is to hire a total of 67 employees. The average hourly rate of the employees is projected to be $26.16.

We are excited about the market opportunities presented by this location and the advantages that locating this facility in Las Vegas will offer our company. In conjunction with Nevada's business-friendly environment, we see this as a first step towards increased growth for Ryze Renewables Las Vegas.

Sincerely,

Matthew G. Pearson
